SUMMARY

B.Tech 3rd year student in Artificial Intelligence & Machine Learning with Knowledge of javaScript,Node.js, APIs and web development.Interested in building real-world applications and continuously learning new technologies to improve technical skills.

EDUCATION

Bachelor of Technology(B.Tech) in Artificial Intelligence & Machine Learning
Ms Engineering College,Bangalore,India
Current CGPA:8.6/10

SKILLS

Programming Languages: JavaScript,Python,React(Basics)

Web Technologies: HTML,CSS

Database & Data Handling: Sql and Mongodb

Cloud & Data Platforms: Azure Databricks

Additional Skills: REST APIs,Problem Solving,Debugging

PROJECTS

1. AI-Based Disease Prediction in Silkworms

- Developed a machine learning model to predict diseases in silkworms using historical and environmental data.
- Implemented data preprocessing, model training, and prediction to assist in early disease detection.

2. Medication Reminder System

- Built a web application to remind patients to take medicines on time.
- Frontend developed using **React.js** and backend implemented with **Node.js** and **Express.js**.

3. MERN Stack Authentication System (JWT)

- Developed a full-stack web application using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Implemented **JWT (JSON Web Token)** authentication for secure user login and registration.

INTERNSHIPS
