(23A01301P) SURVEYING LAB

Course Objectives:

- Know about various linear and angular measuring instruments
- Take Measurements in the linear and angular view
- Determine the area and volume by interpreting the data obtained from surveying activities
- Know modern equipment such as total station
- Draft field notes from survey data

Course Outcomes: Upon the successful completion of this course, the students will able to:

- Handle various linear and angular measuring instruments
- Measure the linear and angular measurements
- Calculate the area and volume by interpreting the data obtained from surveying activities
- Handle modern equipment such as total station
- Prepare field notes from survey data

List of Field Works:

1. Chain survey of road profile with offsets in case of road widening.
2. Determination of distance between two inaccessible points by using compass.
3. Plane table survey ;finding the area of a given boundary by the method of Radiation
4. Fly levelling : Height of the instrument method (differential leveling)
5. Fly levelling: rise and fall method.
6. Theodolite survey: determining the horizontal and vertical angles by the method of repetition method
7. Theodolite survey: finding the distance between two in accessible points.
8. Theodolite survey: finding the height of far object.
9. Determination of area perimeter using total station.
10. Determination of distance between two inaccessible point by using total station.
11. Setting out a curve
12. Determining the levels of contours
